

The Evolution of Wireless 5800 Series Sensors

Quick installation and proven reliability

Building on a legacy

There's a simple reason why Honeywell's 5800 Series is the premier name in wireless. Reliability. Of course, it doesn't hurt that the field-proven 5800 Series is also the most flexible, convenient and cost-effective wireless security in the industry today. We've evolved by taking our wireless security technology to new levels by developing exceptional new products—several of which boast a more convenient, compact design and up to a ten year battery life.

From door or window transmitters, to motion detectors and environmental control sensors, the 5800 Series provides even more exciting features—including double the pet immunity and triple the battery life in our newest PIR (passive infrared motion detector) and the first real solution for protecting vinyl windows. Your First Alert Professional authorized dealer can discuss with you which wireless transmitters you need for your application.

Wireless Transmitters

5878 Wireless Wall Transmitter
Honeywell's attractive, multi-functional 5878 Wireless Wall Transmitter can arm and disarm alarm systems, control lights or operate garage doors with a single touch.

5800Micra Mini Window Recessed Transmitter
Honeywell's patented 5800 Micra Recessed Transmitter is so small, it virtually disappears when installed. With features including up to a ten year battery life and exceptional range, you'll want to use it on every job.

**5818MNL Recessed Transmitter—
Now with Lithium**
With its small, sleek, tapered design, the 5818MNL is another great example of how our technology has evolved to meet your needs. It disappears when installed, making it perfect for discreet applications.

5815 Door/Window Transmitter
Thanks to its low-profile, sleek look, Honeywell's 5815 is the ideal solution for installations where small size, discretion and aesthetics are critical. It provides you with a reliable, convenient and cost-effective solution for door and window protection. Dual reed switches make installations more flexible.

**5820L Slimline Transmitter—
Now with Lithium**
At nearly one third smaller than stand arid transmitters, Honeywell's 5820L is the ideal choice for casement and double hung-windows.

Expect More.

Today's new wave of 5800 Series wireless transmitters provide you with more of what you're looking for:

- More convenient, compact size
- More installation flexibility
- More battery life
- More pet immunity

Motion Detectors

5894PI Wireless Pet Immune PIR

The 5894PI, with its long battery life up to ten years and pet immunity for animals up to 80 lbs., makes wireless more flexible for every installation while reducing service costs. It achieves optimal performance through the use of Uniform Sensitivity Optics, which provides a consistent level of detection throughout

the entire coverage area—no matter what the distance. An EZ opening cover (no tools required) makes installations a snap!

5897-35 Wireless DUAL TEC® Motion Sensor

Designed for the toughest commercial environments, Honeywell's 5897-35 provides all of the advantages of robust DUAL TEC accuracy and reliability with improved false alarm immunity. The combined strength of both microwave and PIR technologies ensures superior detection. Additional features include automatic walk test mode, temperature compensation for improved performance and optional barrier and pet alley lenses for the ultimate in installation ease and flexibility.

Glassbreak Detectors

5853 Wireless Glassbreak Detector

Honeywell's 5853 offers a wireless FlexGuard® solution to protect all types of glass. Installers rely on FlexGuard as a first line of defense, because it keeps intruders where they belong...outside. You'll provide your customers with the highest level of security possible—without any labor and installation headaches or costly service calls.

5800SS1 Wireless Shock Sensor

This compact, versatile detector mounts directly on the glass surface and offers excellent protection for all glass types—including plate, tempered, laminated and wired. It provides outstanding false alarm immunity, especially in problem areas such as kitchens and bathrooms. It's ideal for hard to reach areas like skylights.

Environmental Control

5821 Temperature/Flood Sensor

Honeywell's 5821 is a versatile wireless device that can be configured to operate as either a standalone temperature sensor and/or a remote temperature sensor or flood detector. It is ideally suited for a wide range of applications including bathrooms, laundry rooms and basements.

Purchasing a security system for your home or business is an important decision. Start by choosing a First Alert Professional authorized dealer who will provide the best products and services.

First Alert Professional security systems are designed and manufactured by Honeywell, an industry leader in security technology and a name you can trust. Your First Alert Professional authorized dealer will work with you to custom design a security system to meet all your needs.

First Alert Professional authorized dealers are committed to the communities in which they serve and are dedicated to promoting life safety.

Choose the partner that cares about you, your family, your business and your community. Choose a First Alert Professional authorized dealer.
